

RMS-Kiosk™ EZ-Deli

The most powerful deli kiosk solution for busy supermarkets

RMS-Kiosk is a multi media **multi department** touchscreen customer activated **ordering system** designed for busy supermarkets. RMS-Kiosk allows customers to order sushi, deli items, platters, birthday cakes... **Item locator with store map, item price checker** and **store card** lookup are also available. RMS-Kiosk uses the latest technology (ASP.NET).

How does it work?

Customers walk up to the RMS-Kiosk system, place their order, continue shopping, and pick up their order when they have finished shopping. They save time waiting in line, especially at the deli, and can shop while their order is being filled.

Wireless Support

- No need to run cables.

Kiosks and deli printers connect to **your** in store 802.11 wireless network.

Seamless Scale Interface

(Plum, ADC...)

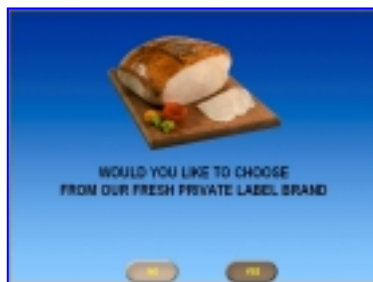

When a batch update is sent to your deli scales, **RMS-Kiosk automatically updates item pricing**. We even flag items "On Sale" when their prices go down. RMS-Kiosk is maintenance free.

RMS-Kiosk Includes:

- ▶ Multi Store Management
- ▶ Multi Level Suggestive Selling
- ▶ Preparation Time Estimates
- ▶ Coupon Generation
- ▶ E-Mail Kiosk Reporting ...

NEW! RMS-Kiosk Order Management Display (OMD)

You can now easily manage your deli order flow. OMD even sends E-Mail messages to customer cell phones when their orders are ready for pickup. RMS-OMD includes reports which analyze staff and slicer productivity.

RMS-Kiosk promotes brands and items

RMS Order Management Display

RMS-Kiosk has a low deployment cost and a very high ROI.

RMS-Kiosk increases sales and customer satisfaction.
